

PUNU N GOWDA

Full Stack Developer

Bengaluru, India | punungowda6@gmail.com | +91-6361666694 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 1 year of professional experience (Jun 2025 – Jun 2026) in Java, Spring Boot, and React across healthcare and enterprise integration domains. Built backend services for OneCIAM at TCS and independently engineered a full-stack algorithmic trading system. Proficient with AI-assisted development tools — Claude, GitHub Copilot, Cursor, and ChatGPT.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Recharts

Backend: Spring Boot, Spring Security, Spring Data JPA, REST APIs, Microservices, Node.js, FastAPI

Databases: MySQL, Redis, TimescaleDB, H2 Database

DevOps & Tools: Git, Maven, CI/CD (GitLab/GitHub), Linux, Agile/Scrum, Postman

Integration: SAP CDC, MuleSoft, ServiceNow

AI/ML Exposure: LLM APIs (OpenAI, Anthropic), RAG Pipelines, Prompt Engineering, Embeddings

PROFESSIONAL EXPERIENCE

Software Engineer · Tata Consultancy Services (TCS)

June 2025 – July 2026

Full Stack Developer — Healthcare Identity & Integration Platform (OneCIAM)

Data Quality Analyst · Anakin Technologies

May 2025 – Jun 2025

PROJECTS

OneCIAM (Healthcare Identity & Integration Platform) — Tata Consultancy Services (TCS)

Stack: Java, Spring Boot, SAP CDC, MuleSoft, Redis, REST APIs

- Developed and integrated REST APIs across merged healthcare identity systems, including MuleSoft-based integration flows, to enable secure identity data exchange between SAP CDC and downstream systems.
- Configured SAP CDC console, Redis caching layers, and affiliate-specific Screen-Sets to support performant identity and access management for migrated customer data.
- Built data validation scripts and executed API/integration testing, contributing to a zero-defect migration of customer identity data.

Data Quality Monitoring — Anakin Technologies

Stack: Python (Pandas, NumPy, SciPy), SQL

- Managed and validated data across 4 client platforms — Uber, Foodpanda, Blacklane, and Pincode.
- Performed data quality checks to identify and report defects, helping maintain data accuracy across all client datasets.
- Monitored hourly data updates throughout the day to minimize error rates and ensure consistent data quality.

Quantitative Algorithmic Trading System (Full Stack)

Stack: Java, Spring Boot, Redis Streams, TimescaleDB, React, Recharts, Tailwind CSS

- Independently architected and built a full-stack, multi-market quant trading system covering NSE/BSE equities, Binance crypto, and Forex — end-to-end from backend engine to live React dashboard.
- Designed a microservices-based signal engine combining MA Crossover, RSI, and Bollinger Bands confluence scoring, streaming real-time signals via Redis Streams over a TimescaleDB-backed time-series data layer.
- Developed a responsive React + Recharts dashboard for live visualization of trading signals and performance.

AI Tools — Code Analyser Web Platform (Live)

Stack: Vite, Alpine.js, FastAPI, PostgreSQL, Resend, Vercel

- Architected and deployed a production full-stack web app (FastAPI ASGI on Vercel + Postgres) offering an offline AI Code Analyser that maps source code to functional/technical specs across 20+ languages and generates detailed Excel compliance reports, including ABAP S/4HANA checks.
- Implemented a complete account lifecycle (email verification, password reset, admin-approval gating) with Postgres persistence and Resend transactional email delivery.
- Built an admin Ops dashboard with live health probes, database stats, Vercel deployment history, and GitHub release tracking with ~60s auto-refresh.

Sentiment Analysis Web Application

Stack: Python, Scikit-learn, Pandas, Streamlit, NLP

- Built and deployed a real-time ML web app for sentiment classification achieving 85% accuracy, implementing Random Forest, KNN, and Logistic Regression models with hyperparameter tuning and NLP preprocessing.

EDUCATION

Master of Computer Applications (MCA) · Acharya Institute of Technology, Bengaluru — GPA: 9.4/10 2022 – 2024

BSc in Computer Science · Government Science College, Bengaluru

2019 – 2022
