A recent MCA graduate with hands-on experience in data analysis, data visualization, and machine learning. Seeking a Data Analyst role where I can contribute my skills in data analytics and drive business insights.

Education

Acharya Institute of Technology

Dec 2022 - Sept 2024

Master of Computer Application (CGPA 8.8)

Government Science College, Hassan

Bachelor's Degree (PMCs) (CGPA 7.14)

May 2019 - Sept 2022

Internship

Edunet Foundation - Data Analyst Intern

Nov 2023 - Dec 2023

- Conducted data analysis on iPhone sales to identify which models were sold most frequently during sales offers.
- Analyzed trends to determine the most popular models over specific periods.
- Utilized **data visualization** to present findings effectively.

Projects

Social Media Impact on Mental Health

- Developed a machine learning model to detect depression from social media posts using algorithms like **Random Forest**, **KNN**, and **Logistic Regression**.
- Analyzed data and categorized it into '**Depressed**' and '**Not Depressed**' groups.
- Deployed the project using **StreamLit** for real-time access to results.
- Tools: Jupyter Notebook, Python, Pandas, Machine Learning algorithms(KNN, Logistic Regression, Random Forest), StreamLit

Vrinda Store Data Analysis

- Created an interactive Excel dashboard analyzing the store's sales data from 2022.
- Cleaned and processed large datasets, applied various filters, and visualized trends in customer behaviour.
- Key insights: March had the highest sales, and women aged 30-49 accounted for the most purchases.
- Tools: Excel, Data cleaning, Data Visualization

Interactive Power BI Dashboard for Madhav Store

- Developed an interactive dashboard to track sales performance.
- Cleaned and transformed raw data, and created visualizations (bar charts, pie charts, line graphs).
- Delivered insights on sales trends, top-performing states, product categories, and payment methods.
- Tools: Power BI, DAX, Data Cleaning

Interactive HR Analytics Dashboard (Power BI)

- Created an interactive HR Analytics dashboard to visualize employee attrition and key HR metrics.
- Cleaned and processed raw HR data to generate insights, using tools such as Power BI and DAX.
- Visualized employee attrition by age, gender, salary, education, and job role, enabling HR teams to identify trends and areas for improvement.
- Provided actionable insights, such as a high attrition rate in employees earning below \$5K and in job roles like Laboratory Technicians and Sales Executives.
- Tools: Power BI, DAX, Data Cleaning, Data Visualization

Credit Card Financial Dashboard Using Power BI

- Developed an Interactive Dashboard using transaction and customer data from SQL database, to provide real-time insights.
- Streamlined data processing and analysis to monitor key performance metrics and trends.
- Shared actionable insights with stakeholders based on dashboard findings to support decision-making processes.
- Tools: Power BI, PostgreSQL, DAX, Data Cleaning, Data Visualization

Skills

Technical Skills

- **Programming:** Python (Good knowledge of OOPS), Java (Core Java and OOPS)
- **Data Analysis Tools:** Power BI (Interactive Dashboards), Excel (Interactive Dashboards), MySQL, and PostgreSQL (Database design and query execution)
- **Machine Learning:** Worked with multiple algorithms for data classification and regression tasks
- **Web Development:** HTML, CSS (Used for responsive and visually enhanced webpages)

Certification

DBMS	NPTEL Certification Course - completed with Silver Medal
AWS	AWS Academy Cloud Foundations [Verify]
Data Analytics	IBM [Verify]
